

1756 PRIMA STRETCH

1756 Prima Stretch is a durable, waterproof four-way stretch nylon knit with a cast Polyurethane (PU) coating. Engineered for healthcare support surfaces and patient care products, it combines conformability, weldability, and bleach resistance to support reliable performance and efficient cleaning.

KEY FEATURES

Four-Way Stretch

Conforms smoothly around cushions, mattresses, and contoured components

Waterproof

Creates a protective barrier against fluids and moisture

RF Weldable

Supports strong sealed seams in fabricated healthcare products

Bleach Resistant

Withstands specified bleach exposure for practical cleaning protocols

APPLICATIONS

Healthcare

Hospital mattress covers, patient-positioning devices, and transfer products

Tactical

Field care pads, protective covers, and portable support surfaces

Seating

Wheelchair cushions, pressure-management covers, and support pads

Industrial

Welded protective covers, flexible containment, and cleanable barriers

SPECIFICATIONS

Composition

Nylon knit with cast polyurethane (PU) coating

Thickness

0.6 mm

Weight

250 gsm
(±10%)

Width

59 or 86 in.

Colors/SKUs

Grey / 21025
Blue / 21024
